Bachelor of Software Engineering

[Pokhara University](#)

Lekhnath, Pokhara

2018 - 12/2023

Projects

- [ECOLIFEFURNITURE](#): eCollifeFurniture is a Laravel-based e-commerce platform offering a seamless B2C shopping experience for furniture enthusiasts, featuring secure authentication, intuitive product management, and responsive design.
- [SILAMBAM](#): We developed a comprehensive content management system (CMS), integrated with e-commerce capabilities, and an app tailored for score management, catering to the rich heritage of Silambam, an ancient Indian martial art originating in Tamil Nadu.
- [OPH GANDAKI](#): Led the development of OPH Gandaki project, a Laravel and Bootstrap-based CMS for the Nepali government website, ensuring end-to-end management and seamless integration for efficient content handling.
- [FAUXIFY](#): Fauxify stands as a robust PHP library, designed to facilitate the generation of synthetic data with ease, providing developers with a versatile toolset for crafting realistic and varied datasets tailored to their specific testing and development needs.
- [JES LORD POWER CONSTRUCTION](#): It specializes in a wide array of construction projects, including building construction, complex development, and architectural endeavors, delivering high-quality results tailored to meet client needs.

Mentorship

- **Websoft Tech. Nepal Internship Program**: As a mentor at WebSoft Technology's internship program, I nurture budding talent with tailored guidance and real-world experience, shaping them into skilled web developers.
- **Websoft Tech. Nepal Instructor**: As a mentor in WebSoft Technology's internship program, I not only provide hands-on guidance but also lead structured web development courses, equipping interns with both theoretical knowledge and practical skills for success in the field.
